## **MANUFACTURER'S CERTIFICATE**

(This document is not required by an import regulation, it is issued voluntarily)

We confirm that the moulded Presswood particle board pallets used in this consignment by our client or distributed via our reseller

Company :  
Address :  
City and Country :

are manufactured, in the same way as particle board. Fine wood particles are first dried in a hot gas steam with a decreasing temperature from 648° C to 138° C over a time period exceeding 30 minutes and then mixed with synthetic resin, deposited in a heat compression mold with 220° temperature and pressed under 98 bar pressure. During this process, the pallet will received an internal temperature of 105° and will maintain an internal temperature of 56° for more than 30 minutes. The finished pallet will have a moisture content of not more than 8%. This manufacturing process will destroy and resident pest, insect, molds or fungi. Due to the high density wood product produceed , the finished product is resistant to any wood boring insects and future infestation.

We confirm that these moulded particleboard pallets are heat processed, so they are considered as sufficiently processed and totally free from any plant pests according FAO-IPPC-ISPM15!
